Our Work

Founded in 1991, the California Native Grasslands Association (CNGA) represents people concerned with the continued loss and degradation of California's grasslands, the most threatened ecosystem in California. Agriculture, invasion by exotic species, development, and other human-related activities have reduced California native grasslands by 99%. An astounding 90% of California's rare plant species live in grasslands.

 canativegrassland

 cagrasslands

The only organization working exclusively to preserve and restore California's native grasslands

The MISSION of the California Native Grasslands Association is to PROMOTE, PRESERVE, and RESTORE the diversity of California's native grasses and grassland ecosystems through education, advocacy, research, and stewardship.

Join Us

Members receive:

A subscription to *Grasslands* quarterly journal

- The latest in grassland research
- Practicalities of grassland restoration
- Species spotlights
- Grasslands to visit

Discounts on Workshops, Events & Field Trips

Access to the latest research & information on grasses and grasslands

Opportunities to be involved in projects & advocacy

Who are we?

CNGA members are conservationists, resource managers, restoration practitioners, students, public agency employees, consultants, farmers, ranchers, seed producers, nursery owners, homeowners, and native plant enthusiasts.
